SHARE Bibliographic and Cataloging Standards and Best Practices

This document incorporates the cataloging standards that have been approved by vote of the SHARE membership as well as SHARE cataloging best practices, which are proposed SHARE cataloging policies that are pending final vote by the SHARE membership. These are considered best practices to be followed until the approval process is complete. For ease of identification, best practices are distinguished from approved standards by italics and the label Best practice in red.

As of: October 13, 2014

Table of contents

1. Definitions
2. Baseline policy statement for cataloging practices in SHARE
3-8. General policies—apply to both cataloging and barcoding libraries
3. OCLC membership policy for SHARE member libraries
4. On-order records
5. On-the-Fly records for In-House material
6. Use of the serials module for magazines and newspapers
7. Cataloging of uncorrected proofs and advance reading copies
8. Entering enumeration of periodicals, annuals, multipart sets, etc.
9-13. Policies on record matching—apply to both cataloging and barcoding libraries
9. Attaching paperbacks and hardbacks on the same bibliographic record
10. Attaching to set vs individual records for multipart audiovisual material
11. Best practice: Attaching to serial vs monograph records for serials other than periodicals
12. Book club editions and regular editions on the same record
13. Records for the same item, with and without accompanying material
14-25. Cataloging procedures—apply to cataloging libraries only
14-21. General procedures—apply to all formats
14. Policy for editing bibliographic records of material owned by the Abraham Lincoln Presidential Library and Museum (ALPLM)
15. Guidelines for retaining ISBNs in a record
16. Wording of General Material Designation (gmd)
17. RDA and hybrid records
18. **Best practice:** Editing AACR2 records to match RDA records with a fictitious character as main entry

19. Use and retention of subject headings

20. **Best practice:** Local series authority records

21. **Best practice:** Contents notes: (MARC tag 505)

22-25. Procedures for individual formats

22. Blu-rays, DVDs, and Blu-ray/DVD combo packs—formatting MARC tag 300 subfield a and use of MARC tag 250

23. Use and retention of subject headings

24. GMD and edition statement in records for sound recordings and preloaded audio players

25. Graphic novels

---

1. Definitions

**Barcoding** – attaching an item/holding record to bibliographic records found in the SHARE database.

**Copy Cataloging** - includes searching for bibliographic records in OCLC when a match is not found in the SHARE database, editing the OCLC bibliographic record, and importing the edited record into the SHARE database.

**Original cataloging** - creation of a bibliographic record when a matching record does not exist in OCLC.

SHARE full member libraries have the option to choose to be either a cataloging library or a barcoding library. **Cataloging library** – Staff have the knowledge to perform copy cataloging. If qualified, staff may also do original cataloging, upgrade less than full-level OCLC master records and make other permanent changes to OCLC master records via the OCLC Expert Community functionality. Catalogers may edit bibliographic records in the local database in accordance with SHARE Bibliographic and Cataloging Standards Committee rules.

Catalogers must agree to comply with SHARE cataloging policies, which will include attending 15 hours of continuing education related to cataloging each fiscal year (July 1 through June 30). The 15-hour requirement applies to each cataloger. For information on how the cataloging continuing education requirement may be fulfilled, see link on the SHARE website.

**Barcoding library** – Staff have the knowledge to search for bibliographic records in the SHARE database and add item/holding records to the matched bibliographic record. Library staff does not perform copy or original cataloging.

**Full-level OCLC record** – a record with an encoding level defined by OCLC as full according to Bibliographic Formats and Standards [http://www.oclc.org/bibformats/en/fixedfield/elvl.html](http://www.oclc.org/bibformats/en/fixedfield/elvl.html)
2. Baseline policy statement for cataloging practices in SHARE
Cataloging in SHARE will follow LC cataloging practice as much as possible, with local exceptions determined on an individual basis. Bibliographic records brought into the SHARE database must be full-level OCLC records, with the exception of acquisition records and records created locally according to SHARE Bibliographic and Cataloging standards (i.e. records for equipment and library-developed kits). SHARE cataloging policies will be subject to continual review and revision by the SHARE Bibliographic and Cataloging Standards Committee and the full membership.

General policies—apply to both cataloging and barcoding libraries

3. OCLC membership policy for SHARE member libraries

SHARE Cataloging libraries
Cataloging libraries must also be OCLC members
--SHARE cataloging policy is to import only full-level OCLC records to the database

SHARE Barcoding libraries
Barcoding libraries are not required to be OCLC members. However, OCLC membership is encouraged so that, in addition to other benefits of membership, barcoding libraries may be included in all processes used to set holdings in OCLC.

4. On-order records
On-order records are intended for patron/staff information only and to allow holds to be placed before items are received. They are not to be used for circulation of material. The use of on-order bibliographic and item records is optional.

For libraries using the acquisitions module, a brief record will be created when the purchase order is created, if a matching record is not already available in the database after an initial search.

Cataloging libraries not using the acquisitions module that want to enter on-order records will create a short bibliographic record using one of the on-order bibliographic record templates created by SHARE Bibliographic Services staff.
--If a record is not already available in the database after an initial search, do not import OCLC records to use as on-order records—use only a brief bibliographic record. This will allow on-order records to be more easily identified.
--Select the bibliographic on-order record template that corresponds to the appropriate format of material. This will allow the correct format icon to be generated in the PAC.
--Add information as needed to make identification as clear as possible to patrons and other staff (i.e. abridged or unabridged, widescreen or full screen, DVD or Blu-ray, etc.)

Barcoding libraries not using the acquisitions module may request on-order bibliographic records be created by Bibliographic Services staff
--Before requesting a record be created, search the database for an existing on-order record
If an existing record is not found, complete the form on the SHARE website to request an on-order record be created.

Any library may attach an on-order item record to a brief record if desired:
- Use an on-order item record template to attach an item record with a circulation status of On-order
- Edit as needed to reflect the material type of the item
- On-order item records must be marked as Holdable with no limits even if the library intends to make the item holdable only by their patrons when it is received
  -- This allows holds to be placed at the bib level by any patron
- Do not attach an item record with a circulation status other than On-order to any brief on-order bibliographic record.

When the item is received:
- **Cataloging libraries**: The first cataloging library or SHARE cataloging center that receives the item will import an OCLC record and also search the database for a matching on-order record.
  -- Cataloging libraries may merge the on-order record to the OCLC record, or may notify SHARE Bibliographic Services staff to merge the records (notification may be made by any library)
  -- This will move all on-order item records and holds to the new record

- **Barcoding libraries**: send your item to IHLS for cataloging as usual, or hold the item until an OCLC record is available in the database and the on-order record has been merged.
  -- Once the on-order record has been merged to an OCLC record, libraries may edit the on-order item record as needed when the item is received
  -- At that time, hold limits may be set as desired

5. **On-the-Fly records for in-house material**

No in-house material should be circulated if it is not cataloged. The use of the on-the-fly functionality in Polaris should be reserved for the rare instance of uncataloged material that is mistakenly on the shelf. For example, an item that is identified as missing during an inventory and the item record is deleted, but is later found and returned to the shelf without being recataloged.

SHARE staff will create an on-the-fly item record template for each library. Both the short on-the-fly bibliographic record and attached item record will be marked not to display in the PAC, and the item record will be marked as loanable only to patrons of the branch. The template will include a block that tells the circ staff at check-in to send the item to cataloging. SHARE staff will delete on-the-fly item records after checkin.

6. **Use of the serials module for magazines and newspapers**

All libraries that barcode magazines are required to enter a serial holdings record through the Polaris serials module to show the retention period of all magazines. Creation of serial holdings records is optional for libraries that do not barcode magazines. If your library uses a bibliographic record for newspapers, a serial holdings record must be created. Libraries are not required to barcode or circulate these materials. Use of the serials module is not required for serial material such as test books, travel guides, etc.
7. Cataloging of uncorrected proofs and advance reading copies
Based on a recommendation from the Illinois State Library and information from publishers’ websites, uncorrected proofs and advance reading copies are not intended to be added to the collection. If the library feels the material is important enough to keep (i.e., is of historical significance), it should be marked as non-circulating.

8. Entering enumeration of periodicals, annuals, multipart sets, etc.
It is very important that information in the Volume field of the item record be entered consistently in order for the holds process to work efficiently and equitably.

Item records attached to a bibliographic record for a serial or multi-part item contain information in the Volume field to identify the part, volume, issue number, etc. In these instances, when a patron places a hold, Polaris will ask the patron to select a particular part, volume, issue, etc. The system is designed to group together all items for that particular part or volume from any library and fill a hold from any available item within that group. However, Polaris will group these items together only if data in the Volume field in the item record has been entered consistently.

This policy applies only to item records created through the cataloging module for circulating items where an item record for an individual part is attached to a bibliographic record for a set (i.e., a multivolume set of poetry, or an encyclopedia that is circulated)

The following standard abbreviations should be used:

For Volume, enter:

v. [Arabic numeral]

Examples:
On piece: Volume one
In item record, enter: v. 1

On piece: Volume IV
In item record, enter: v. 4

On piece: Vol. 2
In item record, enter: v. 2

For Book, enter:
bk. [Arabic numeral]

Examples:
On piece: Book One
In item record, enter: bk. 1
On piece: Book VI
In item records, enter: bk. 6

On piece: Book 2
In item record, enter: bk. 2

Important! Although case doesn’t matter (V. and v. will line up together), internal spacing does (v.1 and v. 1 will not line up together).

Note: Do not enter series numbering in the Volume field of the item record (i.e., book 212 of the Goosebumps series). Use the Suffix field of the item record for this information if desired. It will display at the end of the call number.

Exceptions:
This policy does not apply to item records created through the serials module for periodicals. The serials module is set up to automatically enter consistent issue information.

Do not use in records for multipart DVDs or Blu-rays (i.e., a record for the entire season of a televisions series). Discs that are circulated separately must be attached to a record for the individual disc, and the Volume field is left blank.

Policies on record matching—apply to both cataloging and barcoding libraries

9. Attaching paperbacks and hardbacks on the same bibliographic record
Paperbacks and hardbacks may be attached to the same bibliographic record only if they meet the OCLC Bibliographic Formats and Standards match criteria. (http://www.oclc.org/bibformats/en/input.html)

An ISBN on a matching item should be added to the bibliographic record if not already present.

10. Attaching to set vs individual records for multipart audiovisual material
For multipart audiovisual material (i.e., DVDs and audiobooks), attach your holding to the appropriate set or individual record based on how your library intends to circulate the item. An example is the entire season of a television series that consists of several DVDs in one container. If you will be circulating the container as one piece, attach to the record for the set. If you will be circulating the DVDs separately, attach to the records for the individual DVDs.

11. Best practice: Attaching to serial vs monograph records for serials other than periodicals
This policy applies to serials that are published annually or less frequently, such as test books, travel guides, etc.:

--Use a serial bibliographic record for resources that will not circulate in Polaris (i.e., reference material)
--Use a monograph bibliographic record for resources that will circulate in Polaris
--If there is a gap of 5 years or more between editions of a serial, use a monograph bibliographic record, even if the resource will not circulate in Polaris

--If the circulation status of a resource changes (i.e., it goes from non-circulating to circulating, or vice versa) the item record must be transferred to the appropriate serial or monograph bibliographic record

--Retrospective cataloging of existing items is recommended, but not required

--Serials covered in this policy will be attached to the appropriate serial or monograph bibliographic record through the cataloging module. Periodicals (i.e. magazines or journals) will be attached to a serial record through the Polaris serials module.

12. Book club editions and regular editions on the same record
Book club editions may be attached to the record for the regular edition only if they meet the OCLC Bibliographic Formats and Standards match criteria. ([http://www.oclc.org/bibformats/en/input.html](http://www.oclc.org/bibformats/en/input.html))

13. Records for the same item, with and without accompanying material
An item with substantive accompanying material should be cataloged on a separate record from the same item that does not include the accompanying material. Records will not be merged in this instance. This is in accordance with OCLC’s policy on accompanying material.

Cataloging procedures—apply to cataloging libraries only

General procedures—apply to all formats

14. Policy for editing bibliographic records of material owned by the Abraham Lincoln Presidential Library and Museum (ALPLM)
Bibliographic records for material held by the ALPLM may be edited only by ALPLM staff and SHARE Bibliographic Services staff.

This is due to the unique nature of the ALPLM collection and the extensive local edits that are made to some records.

Other libraries may attach item records and serial holdings records, but will not be able to edit the bibliographic record. SHARE Bibliographic Services staff will edit records only for MARC coding changes and authority control. For all other edits, libraries may contact ALPLM cataloging staff directly.

15. Guidelines for retaining ISBNs in a record
Delete ISBNs for formats other than what is being described by the bibliographic record. For example, delete the ISBN for the ebook from a record for the regular print version. Also, delete ISBNs for other volumes in records for an individual volume of a set.
16. Wording of General Material Designation (gmd)

The standard general material designation (gmd) terms as prescribed in AACR2R, para. 1.1C1 should be used in records for large print material and for non-print formats.

17. RDA and Hybrid Records

Bring in an RDA or hybrid record if it matches the item in hand. A hybrid record is defined as an AACR record to which some RDA elements have been added, but it is not considered an RDA record.

Do not make changes to RDA or hybrid records, EXCEPT:

-- Add a gmd (245 subfield h) to records for non-print material and large print books. Use the terms in AACR, para. 1.1C1, list 2.
-- Edit as needed to fix incorrect cataloging (i.e., fixed field coding is wrong) or to add subject headings, notes, summaries, etc.
-- If a title has been entered in all capital letters, edit to AACR formatting. Otherwise, accept title formatting as it appears. This applies to a title in any MARC field in the record.

Verify names, series, and subjects as usual.

18. Best practice: Editing AACR2 records to match RDA records with a fictitious character as main entry

In cases where the main entry in an RDA record is different than the main entry in an AACR record because of the provision in RDA that allows a fictitious character to be main entry, the following actions should be taken:

- Edit AACR2 records to make the fictitious character main entry in the 100 field
- Add a 700 added entry to the record with the name of the author that was originally in the 100 field

It is not necessary to recatalog the entire record as an RDA record.

The option to change spine labels and call numbers based on these edits is an individual library decision.

Background: RDA cataloging rules allow a fictitious character to be main entry, which was prohibited under AACR2. This change may cause records to have different main entries, which can lead to inconsistent search results.

Example: AACR2 records for the Murder, she wrote books list Donald Bain as the main entry, although the statement of responsibility reads Jessica Fletcher and Donald Bain. As a fictitious character, Jessica Fletcher would not be considered an author under AACR2, so could not be used as main entry.

RDA allows fictitious characters to be considered creators (i.e., authors), so RDA records for the Murder, she wrote books list Jessica Fletcher as main entry.

19. Use and retention of subject headings

The following types of heading will be used/retained in bibliographic records:

- LCSH, lcgft, gsafd
• LC children’s headings if different than the adult heading
• Approved local subject headings in MARC tag 690
• Approved local genre/form headings in MARC tag 655 (coded local in subfield 2)
• Medical subject headings (MeSH)
• Foreign language subject headings if they are the same as the language of the item being cataloged. For videorecordings, this includes the main language track and any dubbed language tracks. This does not include languages of subtitles. Do not add foreign language subject headings if they aren’t already in the record.

The following types of subject headings will be deleted from records in Polaris:
• Sears headings
• Any heading from a thesaurus other than lcgft or gsafd (i.e., migfg, bisach, fast, etc.)
• Foreign language subject headings if they are different than the language of the item being cataloged. For videorecordings, delete foreign language subject headings for the language(s) of subtitles.

In juvenile material, LC adult subject headings will be used with juvenile subdivisions. LC children’s headings will be used/retained only if they are different from the adult heading. In bibliographic records for juvenile audiobooks, do not use the subdivision Juvenile sound recordings in subject headings. Use the subdivision Juvenile fiction or Juvenile literature as appropriate.

Local subject headings must be approved before being used in SHARE records.

20.Best practice: Local series authority records
SHARE Bibliographic Services staff will create local series authority records in the Polaris database when requested in cases where a series statement appears on a resource, but no national-level series authority record has been established. A local series authority record will be established if documentation can be provided that at least three items have been published with the same series title, or if the series title is on the resource.

A local series authority record will not be created in cases where the only source of series information is the CIP. Series information must also appear elsewhere on the resource.

Local series authority records will include all formats. Separate local series authority records will not be created for different formats of the same series, i.e. print, audiobook, large print, etc.

To request the creation of a local series authority record, enter a help desk ticket and attach scans of the title page, verso, disc label, etc. and any information on the resource pertaining to the series, i.e., series title page, cover, container, etc. as well as any additional information from other sources such as author’s web site, etc. that you feel may be helpful.
21. **Best practice: Contents notes: (MARC tag 505)**

Contents notes contain the titles of separate works or parts of an item. They may also include statements of responsibility and other information about the works or parts. Contents notes increase access to resources through keyword and/or indexed searches.

**Type of contents notes**
- **Basic (unenhanced):** All information is coded in one subfield a. Searchable by keyword only
  - MARC Coding: 505 2\(^{nd}\) indicator blank
- **Enhanced:** Titles entered in individual subfield t. Searchable by keyword and title index.
  - MARC Coding: 505 2\(^{nd}\) indicator 0

**General guidelines**
- In most cases, retain existing contents notes in OCLC records. Enhance as appropriate according to the guidelines below
  - Exception: delete a contents note in a record for a fiction work if the contents note reflects only chapter titles rather than titles of essays, plays, poems, or short stories, etc.
- If an OCLC record has an unenhanced contents note and the record contains added entries for each title in MARC tag 740, it may be left as is.
- If an OCLC record has an unenhanced contents note but does not contain added 740s for each title, the contents note should be enhanced if appropriate according to the guidelines below.
- Add contents notes to master record before exporting the record to Polaris
- Omit generic terms such as Introduction, Conclusion, Prologue, Finale, Overture, and similar terms used as titles. If these terms have been omitted, the contents note should be coded as a partial contents note (first indicator 2).
- Retain initial articles in titles in subfield t. This includes initial article in English (a, an, the) as well as initial articles in other languages

**RESOURCES WITH 25 OR FEWER WORKS**
Applies to:
- Essays
- Plays
- Poems
- Short stories

Use an enhanced contents note to record the titles and other appropriate information.
See section below for guidance on sound recordings and music

**RESOURCES WITH MORE THAN 25 WORKS**
Applies to:
- Essays
- Plays
- Poems
- Short stories
For resources with more than 25 works an enhanced contents note may be added, but is not required. See section below for guidance on sound recordings and music.

If a complete enhanced contents note is not provided, a partial enhanced contents note can be provided for the more significant works (i.e. longer and/or more widely known). A MARC tag 520 (summary note) should be added to give a more complete picture of the extent of the work; for example: “A collection of 68 short stories chosen from those appearing in 'The New Yorker' from February, 1925 to September, 1940”.

TABLE OF CONTENTS FOR NONFICTION
If a nonfiction work contains a contents note that gives chapter titles, the note may be retained in the record if the cataloger feels the contents note gives helpful information about the nature of the work or provides helpful keyword access. This is up to cataloger’s judgment and is not required. Do not enhance the contents note in this situation.

When an unenhanced table of contents note for chapter titles is retained in a record, add the phrase [Table of contents] at the beginning of the field. Often it is difficult to tell if something is a table of contents or a list of essays, etc. This will make it very clear that it is a table of contents, and someone will not go back and enhance the field when they shouldn’t.

Example of unenhanced table of contents note:
505; 0 ; a [Table of contents]. Workers in the United States -- Information technology jobs and standards -- IT fluency : what is it, and why do we need it? -- Campus human resource leadership : a mandate for change -- Recruiting, retaining, and reskilling campus IT professionals -- Technology across the curriculum : information, literacy, and IT fluency.

Items with a collective title
An unenhanced 505 should be constructed with the title and author of all the included works. A separate 700 should be made for each author and title.

Example:
245; 02; $a A purrfect romance / $c Jennifer Blake, Robin Lee Hatcher, Susan Wiggs.

505; 0 ; $a Out of the dark / Jennifer Blake -- A wish and a prayer / Robin Lee Hatcher -- Belling the cat / Susan Wiggs.

700; 12; $a Blake, Jennifer, $d 1942- $t Out of the dark.
700; 12; $a Hatcher, Robin Lee. $t Wish and a prayer.
700; 12; $a Wiggs, Susan. $t Belling the cat.

Items without a collective title
If the collection lacks a collective title, and one work predominates, treat that title as the title proper and name the other work(s) in a variant title and an added title entry.
If the collection lacks a collective title, and no one work predominates, treat the item as a unit. Use the following examples when treating as a unit.

**Example of works by a single author without a collective title:**

100; 1 ;$a Hemingway, Ernest, $d 1899-1961.
245; 14;$a The old man and the sea ; $b For whom the bell tolls / $c Ernest Hemingway.
246; 3 ;$a Old man and the sea ; For whom the bell tolls
740; 02;$a For whom the bell tolls.

**Example of works by different authors without a collective title:**

If the collection contains no more than three works, enter under the heading appropriate to the first and make analytical added entries for the second and third works.

100; 1 ;$a Conrad, Joseph, $d 1857-1924.
246; 3 ;$a Heart of darkness ; Ethan Frome ; Emma
700;12  ;$a Wharton, Edith, $d 1862-1937. $t Ethan Frome.
700;12 ;$a Austen, Jane, $d 1775-1817. $t Emma.

If the collection contains four or more works that are entered under four or more different headings, enter the collection under the heading for the work named first. Add a partial enhanced 505 for the other titles. Do not include the first title in the 505.

100; 1 ;$a Austen, Jane, $d 1775-1817.
245; 10;$a Sense and sensibility / $c by Jane Austen.
505; 20;$t Age of innocence / $r Edith Wharton -- $t Far from the madding crowd / $r Thomas Hardy -- $t Vicar of Wakefield / $r Oliver Goldsmith.

**COLLECTIVE BIOGRAPHIES**

If the collective biography includes 25 names or less, include an unenhanced 505 for all names. If the collective biography includes more than 25 names, it is optional to include an unenhanced 505. If desired, a partial unenhanced 505 may be included with only those names considered significant.

Transcribe names from the table of contents. However, if the table of contents does not include the entire name of the person, the missing part(s) should be added in brackets.

**Example:** Table of contents lists Queen Victoria just as Victoria. It should be listed as Victoria [Queen of Great Britain]

Use judgment when adding explanatory information.

**SOUND RECORDINGS AND MUSIC**

List all individual works on a sound recording and a music score. This does not apply to a music instruction book that include short pieces from various songs, but for scores that contain complete songs.
Classical music sound recordings
Make an enhanced 505 and the appropriate analytical entries (700 $a for composer, $t for title).

Pop, folk, ethnic, or jazz sound recordings and music scores
Make an enhanced contents note for these materials.

Include statement of responsibility if appropriate. Will often be the performer and not the composer. Enter a 700 for each performer.

Procedures for individual formats

22. Blu-rays, DVDs, and Blu-ray/DVD combo packs—formatting MARC tag 300 subfield a and use of MARC tag 250

Blu-rays and DVDs
300  1 videodisc (include time if available)
Add an edition statement from the list below in MARC tag 250 as appropriate to distinguish format:
250  [Blu-ray].
250  [3D Blu-ray].
250  [DVD].
250  [3D DVD].
This may be added to an existing edition statement, separated by a comma
250  Collectors ed., [Blu-ray].

Blu-ray/DVD combo packs
300  [Number] videodiscs (include time if available)
Note: Disregard digital copies, if included in container
Add an edition statement, formatted as indicated below, alone or as an addition to an existing edition statement:
250  [Format/Format combo].
Example: [3D Blu-ray/Blu-ray/DVD combo]

23. Large print and larger print materials

Large print
All large print materials should be on a record for large print. They cannot be added to a record for the regular print. Material must meet the criteria for large print as defined in National Association for Visually Handicapped (NAVH) standards.

Do not use these procedures for material designated as “larger print”—see the section below.

Fixed fields
Form: d
**General material designation (gmd) (Local edit)**
Add a general material designation to the 245 for all large print book records in Polaris. This is a local edit only, so should not be added when creating original records or enhancing records in OCLC.

|h [text (large print)]

245 10 All along the watch tower|h[text (large print)] /|cby Jane Worth.
245 10 Gone fishing|h[text (large print)] :|b a novel /|c by Matt Gibbons.

**Edition statement**
If the item has a large print edition statement, code that in a 250.

250  Gale large print ed.

**Physical description**
Add (large print) after the pagination.

300 356 p. (large print) ;|c28 cm.

**Subject headings**
Add a subject heading for large type books in addition to any other appropriate subject headings. Do not add subdivisions to the large type books subject heading. This should be the last subject heading in the record.

655 ^0 Large type books.

**“Larger print” materials**
“Larger print” materials cannot be added to the bibliographic record for the regular print or for the large print version even if the publisher is the same and/or the date is the same. “Larger print” materials must be cataloged on a separate record. Items that are marketed as “larger print” will not be treated as large print in the bibliographic record:

- Do not add the large print gmd to the 245
- Do not add (large print) to the 300
- Do not add the subject heading Large type books.

**Fixed fields (Local edit)**
Delete code d from the Form fixed field. This is necessary to prevent Polaris from generating a Large Print icon in the PAC.

**Edition statement**
Add the following edition statement to larger print records in OCLC to keep the records from being merged incorrectly in WorldCat.

250  [Larger print ed.]
Subject headings (Local edit)
Add a local subject heading for Larger type books in addition to any other appropriate subject headings. Do not add subdivisions to the larger type books subject heading. This should be the last subject heading in the record.

690 Larger type books.

24. GMD and edition statement in records for sound recordings and preloaded audio players
The gmd [sound recording] will be used in all records for sound recordings except preloaded audio players. Records for these devices will use the gmd [electronic resource] to make them more easily distinguishable from audiobook records.

Add an edition statement to records for MP3 sound recordings to distinguish format. Add an edition statement to records for preloaded audio players such as Playaway and GoReader to distinguish brand. This may be added to an existing edition statement, separated by a comma.

Examples:
MP3
245 $h [sound recording]
250 Anniversary edition, [MP3-CD].

Preloaded audio player
245 $h [electronic resource]
250 [Playaway].

25. Graphic novels
Bibliographic Record
Do not use serial records for graphic novels—use a monograph record for the individual volume.

Subject headings
Use the free-floating form subdivision $v Comic books, strips, etc. with all topical headings.
Examples:
650 0 $a Runaway teenagers $v Comic books, strips, etc.
650 0 $a Voyages and travels $v Comic books, strips, etc.

Form and Genre headings (655)
Use the following form heading for all graphic novels and comic book compilations:
655 0 $a Graphic novels.

Translations/adaptations
When a translated work has been adapted, enter the work under the person responsible for the adaptation. Make an added entry for the original author. Example:

100 1 $a Jones, Gerard.
245 10 $a Dragon ball. $n Vol. 1 / $c story and art by Akira Toriyama ; [English adaptation by Gerard Jones].
700 1 $a Toriyama, Akira.
