SHARE Local Practice for Use of Genre Terms—Editing Guide for Fiction and Graphic Novels

SHARE local practice on the <u>use of genre terms</u> directs the use of genre and form terms from the LCGFT list when appropriate in records in Polaris, with some exceptions where we will continue to use the gsafd term.

When editing records in Polaris, gsafd terms should be changed to the appropriate lcgft term, except as noted below.

Where the terms are the same, change \$2 gsafd to \$2 lcgft.

Where the terms are different (noted in bold print in the list below), delete the gsafd term and use the lcgft term instead.

LCSH terms that are coded as topical headings in MARC tag 650 should be changed to lcgft terms when appropriate.

The list below contains some commonly found terms from the GSAFD and some LCSH terms with their equivalent term in the LCGFT. This is not an exhaustive list—new terms are added frequently. Be sure to check the LCGFT for appropriate terms.

GSAFD/LCSH term	LCGFT TERM with MARC coding
